

1. NSP3 Grantee Information

NSP3 Program Administrator Contact Information	
Name (Last, First)	Jennifer Fults
Email Address	jennifer.fults@indy.gov
Phone Number	317-327-5899
Mailing Address	City/County Building Ste. 2042 200 E. Washington Street Indianapolis, IN 46204

2. Areas of Greatest Need

Map Submission

The maps generated at the HUD NSP3 Mapping Tool for Preparing Action Plan website is included as Attachment D.

Data Sources Used to Determine Areas of Greatest Need

Describe the data sources used to determine the Areas of Greatest Need.
Response: HUD NSP3 Mapping Tool for Preparing Action Plan City of Indianapolis Neighborhood Health Indicators Project NSP1 planning concepts and strategies

Determination of Areas of Greatest Need and Applicable Tiers

Describe how the Areas of Greatest Need were established and whether a tiered approach is being utilized to determine the distribution of funding.
Response: The Areas of Greatest Need were established using the NSP3 Planning Data generated by the HUD NSP3 Mapping Tool for Preparing Action Plan and data from the City of Indianapolis' Neighborhood Health Indicators Project. Areas within the City of Indianapolis have been identified as the Areas of Greatest Need (see Attachment A). These areas are targeted for NSP3 because they had high "Neighborhood Scores," as indicated in the NSP3 Planning data and the highest areas of need, as denoted by high Indianapolis Health Indicator scores. The Neighborhood Scores range from 1-20, with 20 indicating the highest need. The Indianapolis Neighborhood Health Indicators Project is a tool to assess current neighborhood conditions and predict future areas of concern. The project utilizes GIS mapping analysis to grade current neighborhood conditions based on 11 data indicators. Marion County is broken down into 658 Census Block Groups and each block group is given a ranking. The block groups are then divided into five categories: in decline, stable to declining, stable, stable to improving, and improved. These categories are used to assist in resource allocation.

The 11 data indicators include: education level, income, poverty, unemployment, demolition permits, vacant/boarding orders, repair orders, long-term utility disconnects, foreclosures, new building permits and assessed valuation. A listing of the neighborhood health indicator scores ranging from 1 to 658 is attached (see Attachment B). The higher the score, the higher the need.

The table below identifies Neighborhood Scores and the Neighborhood Health Indicator Scores.

Areas of Greatest Need Location	Neighborhood Score	Neighborhood Health Indicator Score
Location 1/West	20	376
Location 2/Keystone	19.72	576
Location 3/Meadows	19	478, 516
Location 4/Smart Growth	17.31	467, 482, 516, 517, 541, 572, 573, 594, 597, 614, 621, 639, and 645
Location 5/Winona	18	566, 606
Location 6/Land Banking	18.09	Not Applicable

The Neighborhood Scores identified by the HUD NSP3 Mapping Tool meet HUD's threshold of 17. The lowest neighborhood score for Indianapolis' Areas of Greatest Need is 17.31; however, this same area had some of the highest Health Indicator scores. This information indicates that each of the five areas identified are experiencing high foreclosures, highest number of subprime mortgages, increasing number of vacant units, substandard housing and decreasing assessed values. In addition, these areas have lower-income residents and higher rates of unemployment.

Attachment C includes maps of the Neighborhood Indicator Scores for each Area of Greatest Need. The darker the color, the greater the need. The NSP3 Areas of Greatest Need are outlined in red. These maps also indicate need in the adjacent block groups. All City of Indianapolis NSP3 funding will be invested in these Areas of Greatest Need. Indianapolis is proposing to use two strategies with NSP3 funding: 1) Invest NSP3 in areas that have the highest need to impact the current housing market and improve quality of life for residents and 2) Invest NSP3 in areas that are beginning to decline and that are adjacent to declining neighborhoods to stem the weakening housing market, slow down the deterioration and increase private investment. Location 6 was selected based on the planning process completed for NSP 1 and is synonymous with the Indianapolis NSP 1 target area.

Each Area of Greatest Need has been mapped using the HUD NSP3 Mapping Tool (see Attachment D). In addition, this HUD tool provides NSP3 Planning Data that was used to determine the Areas of Greatest Need. The Planning Data includes the following information for each area:

- Percent of low- and middle-income persons
- Vacancy Estimates
- Foreclosure Estimates
- Unemployment Data

This data was used to design the Indianapolis NSP3 program which focuses on demolition of blighted structures and development of quality affordable rental housing in Areas of Greatest Need. The NSP Planning Data can be found in Attachment E. NSP3 regulations require that demolition costs not exceed

10 percent of the total NSP3 award. Indianapolis is requesting a waiver to exceed the 10 percent amount. This Plan proposes to spend 25 percent (\$2,000,000) of the award to demolish blighted structures. This waiver can be found in Attachment F.

3. Definitions and Descriptions

Definitions

Term	Definition
Blighted Structure	<p>"Blight" is the state or result of deterioration, decay or owner negligence that impairs or destroys property and erodes the fabric of the surrounding neighborhood. Blight is caused by properties that constitute a risk to public health, safety or welfare including vacant and boarded structures, accumulated trash and debris, rodent infestation, high weeds and grass, graffiti, inoperable vehicles, or empty structures that remain accessible to vagrants and criminals which breed opportunities for fires and other property vandalism.</p>
Affordable Rents	<p>Properties assisted with NSP shall be occupied by persons/households earning less than 120 percent of the area median family income. In addition, at least 25 percent of the NSP funds are to be used for the purchase and redevelopment of abandoned, foreclosed upon, or vacant housing units that will be used to house individuals or families whose incomes do not exceed 50 percent of the area median family income.</p> <p>Using HUD's HOME Program Rents, calculate affordable rents as follows for households earning:</p> <ul style="list-style-type: none"> • between 81 to 120 percent of the area median family income rent shall not exceed 2 times the 50 percent Rent Limit; • between 51 to 80 percent of the area median family income rent shall not exceed the 65 percent Rent Limit (as defined by HUD); • 50 percent or less of the area median family income property owners shall use the Low HOME Rents. <p>In all cases, rents shall not exceed the market rent for the area for that type and quality of housing.</p> <p>NSP affordable rents assume that utilities are included in the rent payment. If tenants are paying utilities separate from rent, the rent paid to the landlord plus a utility allowance (defined by local Section 8 policies) shall not exceed the maximum rents defined above.</p>

Descriptions

Term	Definition										
Long-Term Affordability	<p>Indianapolis will use a structure similar to the HOME program standards at 24 CFR 92.252 (a), (c), (e) and (f) and 92.254 to ensure that the units remain affordable. A period of affordability will be established based on the amount of NSP3 funds in the unit and the housing activity. The table below outlines the City of Indianapolis NSP3 guidelines:</p> <table border="1"> <thead> <tr> <th>NSP3 Investment Per Unit</th><th>Length of the Period of Affordability</th></tr> </thead> <tbody> <tr> <td>Less than \$15,000</td><td>5 years</td></tr> <tr> <td>\$15,000-\$40,000</td><td>10 years</td></tr> <tr> <td>More than \$40,000</td><td>15 years</td></tr> <tr> <td>New Construction of rental housing</td><td>20 years</td></tr> </tbody> </table> <p><u>Enforcement Mechanisms for Affordability Compliance for Rental</u></p> <p>The City will ensure affordability compliance by requiring covenants that will run with the property. The covenants will require that the property be maintained as rental housing and all NSP-funded units shall remain affordable as shown in the preceding table from the date of completion. In instances where NSP funds are invested to meet the requirement that 25 percent of the NSP funds awarded to Indianapolis must be used for housing activities that benefit households whose incomes do not exceed 50 percent of the area median family income, the covenants will state that the property must be maintained as rental housing and all NSP-funded units shall remain affordable to households earning less than 50 percent of the area median family income for the required period from the date of completion.</p> <p>During the period of affordability, all owners of NSP-assisted rental units are required to certify tenant income upon initial lease-up. Tenant income certification must be documented in writing from the actual source of the income; in accordance with HUD's booklet on certifying tenant incomes using the Section 8 (or Part 5) methodology.</p> <p>If a tenant's income increases over time, the tenant may remain in the unit; however, the rent amount must be adjusted to meet the affordable rent definition on page 5. Tenants must be given a minimum 30-day written notice prior to rent adjustment and must comply with lease documents and state and local laws.</p>	NSP3 Investment Per Unit	Length of the Period of Affordability	Less than \$15,000	5 years	\$15,000-\$40,000	10 years	More than \$40,000	15 years	New Construction of rental housing	20 years
NSP3 Investment Per Unit	Length of the Period of Affordability										
Less than \$15,000	5 years										
\$15,000-\$40,000	10 years										
More than \$40,000	15 years										
New Construction of rental housing	20 years										

Enforcement Mechanisms for Affordability Compliance for Homeownership

Ensuring Continued Affordability

The type of subsidy invested in the property will determine which of the following provisions are to be followed. When a buyer subsidy is provided in the amount of \$1,001 or more, alone or in conjunction with a development subsidy, the Recapture Provision is to be followed. When a development subsidy only is provided, such as rehabilitation or construction financing, the Resale Provision is to be followed.

Recapture Provisions for NSP Activities

1. This provision authorizes the City of Indianapolis to recapture the entire NSP buyer subsidy during the period of affordability.
2. The buyer subsidy is needed when a gap exists between what the buyer can afford and the value of the home, plus closing costs. The buyer subsidy will be accounted for when the value of the home is reduced to make it affordable (Fair Market Value Reduction), closing costs are paid, down payment assistance is provided, or a credit is provided to the buyer from the amount due to the seller at closing.
3. Project sponsors will be required to initiate a mortgage and promissory note in the amount of the NSP buyer subsidy with the City of Indianapolis, Department of Metropolitan Development as the mortgagor and the homebuyer as the mortgagee.
4. The loan will be a zero percent interest Deferred Payment Loan and will be subordinate to a first mortgage. Loan documents will state that the loan amount is due and payable from available net sale proceeds when the homeowner is no longer the principal resident of the house. Loan documents will specify that if ownership is transferred due to sale of the property, payment shall be made to the City from available net sale proceeds during the period of affordability. If the original buyer is in non-compliance at any time during the period of affordability, the full loan amount will be immediately due and payable to the City of Indianapolis.
5. The purchaser must occupy the property as their primary residence during the period of affordability.
6. The homeowner may sell the property to any willing buyer as long as the recapture requirement is met.

The Resale Provision

1. This provision ensures that a NSP-assisted property remains

	<p>affordable during the entire period of affordability. The length of the period of affordability is determined by the amount of NSP funds provided as development subsidy only in accordance with the table above.</p> <ol style="list-style-type: none"> 2. The affordability period is terminated should any of the following events occur: foreclosure, transfer in lieu of foreclosure or assignment of a Federal Housing Agency insured mortgage to HUD. The original housing developer may use purchase options, rights of first refusal or other preemptive rights to purchase the housing before foreclosure to preserve affordability. 3. Project partners will be required to initiate a Declaration of Covenants to enforce the terms of the resale provision. In addition, the project partner will initiate a mortgage and promissory note to ensure that the entire amount of NSP funds invested will be repaid in the event of non-compliance or foreclosure. The note and mortgage shall have the City of Indianapolis, Department of Metropolitan Development as the mortgagor and the homebuyer as the mortgagee. 4. During the period of affordability, the property must be leased or sold income-qualified buyers/tenants. 5. For homeownership, the purchaser must occupy the property as their primary residence. 6. The homeowner is guaranteed a fair return on their investment as described in the promissory note. <p>A fair return on borrower's original investment shall be the sum of the Appreciation in Value during Borrowers ownership¹, borrower's original down payment, the amount of the payments made on the principal of the loan by the Borrower and 80% of the value of the documented (receipts) capital improvements made by the Borrower to the property</p> <p>¹ Calculation of the appreciation in value during the borrower's ownership: Property has appreciated during the borrowers ownership shall be determined by calculating the future value of the cash flows by multiplying the original purchase price of the property by an interest rate calculated by MIBOR and by the number of years the property has been owned by the borrower to determine the appreciation in value during ownership.</p> 7. A homeowner may sell the property after the period of affordability, without any restrictions or regulations.
--	--

Housing Rehabilitation Standards	All properties receiving NSP3 assistance shall meet the Indiana Residential Code and the Indianapolis HOME rehab standards prior to sale or lease.
----------------------------------	--

4. Low-Income Targeting

Low-Income Set-Aside Amount

Identify the estimated amount of funds appropriated or otherwise made available under the NSP3 to be used to provide housing for individuals or families whose incomes do not exceed 50 percent of area median income.

Response:

Total low-income set-aside **percentage** (must be no less than 25 percent): 32%

Total funds set aside for low-income individuals = \$2,505,000

Meeting Low-Income Target

Provide a summary that describes the manner in which the low-income targeting goals will be met.

Response:

Indianapolis will collaborate with the Indianapolis Housing Trust Fund, the Indianapolis Coalition for Homelessness Intervention and Prevention, Indiana Housing and Community Development Authority, non-profit housing developers and for-profit housing developers to allocate \$2,505,000 to housing development projects that will house individuals and families whose incomes do not exceed 50 percent of the area median family income.

5. Acquisition and Relocation

Demolition or Conversion of LMI Units

Does the grantee intend to demolish or convert any low- and moderate-income dwelling units (i.e., \leq 80% of area median income)?	No
--	----

If yes, fill in the table below.

Question	Number of Units
The number of low- and moderate-income dwelling units—i.e., \leq 80% of area median income—reasonably expected to be demolished or converted as a direct result of NSP3-assisted activities.	0
The number of NSP3 affordable housing units made available to low-, moderate-, and middle-income households—i.e., \leq 120% of area median income—reasonably expected to be produced by activity and income level as provided for in DRGR, by each NSP3 activity providing such housing (including a proposed time schedule for commencement and completion).	0
The number of dwelling units reasonably expected to be made available for households whose income does not exceed 50 percent of area median income.	0

6. Public Comment

Citizen Participation Plan

Briefly describe how the grantee followed its citizen participation plan regarding this proposed substantial amendment or abbreviated plan.

Response:

The City of Indianapolis provided the required 15 calendar days of public comment via the publication of our Substantial Amendment on our website on February 11, 2011.

Summary of Public Comments Received.

The summary of public comments received is included in Attachment G.

Appendix: NSP3 Action Plan Contents Checklist

The checklist below is an optional tool for NSP3 grantees to help to ensure that all required elements of the NSP3 Substantial Amendment or the Abbreviated Plan are submitted to HUD. This checklist only includes the minimum required elements that must be included in the NSP3 Action Plan and grantees may want to add additional details. This document must be protected, as described above, in order to use the checkboxes in this checklist.

1. NSP3 Grantee Information

	Yes
Did you include the Program Administrator's name, address, phone, and email address? <i>See Page 1</i>	<input checked="" type="checkbox"/>

2. Areas of Greatest Need

	Yes
Does the narrative description describe how funds will give priority emphasis to Areas of Greatest Need? <i>See pages 1-2</i>	<input checked="" type="checkbox"/>
Does the narrative description specifically address how the funds will give priority emphasis to those areas:	
• With the highest percentage of home foreclosures?	<input checked="" type="checkbox"/>
• With the highest percentage of homes financed by subprime mortgage related loan?; and	<input checked="" type="checkbox"/>
• Identified by the grantee as likely to face a significant rise in the rate of home foreclosures?	<input checked="" type="checkbox"/>
Did you create the Area of Greatest Needs map at http://www.huduser.org/NSP3/NSP3.html ?	<input checked="" type="checkbox"/>
Did you include the map as an attachment to your Action Plan? <i>See Attachments A and D</i>	<input checked="" type="checkbox"/>
ONLY Applicable for States: Did you include the needs of all entitlement communities in the State?	<input type="checkbox"/>

3. Definitions and Descriptions

	Yes
--	-----

Are the following definitions and topics included in your substantial amendment?: <i>See Pages 3-5</i>	
• Blighted structure in context of state or local law	<input checked="" type="checkbox"/>
• Affordable rents, <i>See Page 3</i>	<input checked="" type="checkbox"/>
• Ensuring long term affordability for all NSP3 funded housing projects, <i>See Page 3-5</i>	<input checked="" type="checkbox"/>
• Applicable housing rehabilitation standards for NSP3 funded projects <i>See Page 5</i>	<input checked="" type="checkbox"/>

4. Low-Income Targeting

	Yes
Did you identify the estimated amount of funds appropriated to provide housing that meets the low-income set aside target? <i>See Page 5</i>	<input checked="" type="checkbox"/>
Did you provide a summary describing how your jurisdiction will meet its low-income set aside goals? <i>See Page 6</i>	<input checked="" type="checkbox"/>

5. Acquisition & Relocation

	No
For all acquisitions that will result in displacement did you specify:	
• The planned activity, <i>N/A</i>	<input type="checkbox"/>
• The number of units that will result in displacement, <i>N/A</i>	<input type="checkbox"/>
• The manner in which the grantee will comply with URA for those residents? <i>N/A</i>	<input type="checkbox"/>

6. Public Comment

	Yes
Did you provide your draft of the NSP3 substantial amendment for a minimum of 15 days for public comment?	<input checked="" type="checkbox"/>
Did you include the public comments you received on the NSP3 substantial amendment in your plan? <i>See Attachment G</i>	<input checked="" type="checkbox"/>

7. NSP3 Information by Activity

	Check all that apply
Did you include a description of all eligible NSP3 activities you plan to implement with your NSP3 award? <i>See pages 7-11</i>	<input checked="" type="checkbox"/>
For each eligible NSP3 activity you plan to implement did you include:	
• Eligible use or uses?	<input checked="" type="checkbox"/>
• Correlated eligible CDBG activity or activities?	<input checked="" type="checkbox"/>
• Associated national objective?	<input checked="" type="checkbox"/>
• How the activity will address local market conditions?	<input checked="" type="checkbox"/>
• Range of interest rates (if any)?	<input checked="" type="checkbox"/>
• Duration or term of assistance?	<input checked="" type="checkbox"/>
• Tenure of beneficiaries (e.g. rental or homeowner)?	<input checked="" type="checkbox"/>
• If the activity produces housing, how the design of the activity will ensure continued affordability?	<input checked="" type="checkbox"/>
• How you will, to the maximum extent possible, provide for vicinity hiring? <i>See Attachment</i>	<input checked="" type="checkbox"/>
• Procedures used to create affordable rental housing preferences?	<input checked="" type="checkbox"/>
• Areas of Greatest Need addressed by the activity or activities?	<input checked="" type="checkbox"/>
• Amount of funds budgeted for the activity?	<input checked="" type="checkbox"/>
• Appropriate performance measures for the activity (e.g. units of housing to be acquired, rehabilitated, or demolished for the income levels represented in DRGR) ?	<input checked="" type="checkbox"/>
• Expected start and end dates of the activity?	<input checked="" type="checkbox"/>
• Name and location of the entity that will carry out the activity?	<input checked="" type="checkbox"/>

8. Certifications

	Yes
Did you sign and submit the certification form applicable to your jurisdiction? <i>See Attachment SF-424 & Certification</i>	<input checked="" type="checkbox"/>

9. Additional Documentation

	Yes
Did you include a signed SF-424? <i>See Attachment SF-424 & Certification</i>	<input checked="" type="checkbox"/>

This map displays a residential neighborhood with a grid of streets. The streets shown are 38TH ST, 34TH ST, 30TH ST, 25TH ST, 22ND ST, 21ST ST, 16TH ST, 10TH ST, MASSACHUSETTS AVE, SHERMAN DR, and I-70. Individual house numbers are printed on the map, with some numbers appearing in red and others in black. A red line runs diagonally across the map, and a blue line follows a winding path. The map is color-coded with various shades of brown, orange, and yellow.

Neighborhood Stabilization Program Grants

The Neighborhood Stabilization Program (NSP) provides grants to address the problems associated with homes that have been foreclosed upon and are creating economic problems for their communities.

The NSP3 mapping tool now provides a summary NSP3 score for all projects drawn. Click on "View Projects", which will list all of the projects (target areas) that have data calculated. It shows the NSP3 score for each target area along with the total estimated housing units in that area. At the bottom of the list is a sum of all housing units in all target areas and the NSP3 score for all target areas drawn. Grantees are advised to know their state minimum and if the summary score is less than the state minimum the grantee should delete, add, or revise target areas. Note that if you delete or add, the tool only recalculates after you close the "View Projects" box and reopen it. HUD also advises grantees to think carefully about the size of their target areas in total. If those target areas have a very large number of total housing units relative to the dollars available, HUD will likely ask that the grantee reduce the number and/or size of their target areas.

NSP3 Score

The neighborhoods identified by the NSP3 grantee as being the areas of greatest need must have an individual or average combined index score for the grantee's identified target geography that is not less than the lesser of 17 or the twentieth percentile most needy score in an individual state. For example, if a state's twentieth percentile most needy census tract is 18, the requirement will be a minimum need of 17. If, however, a state's twentieth percentile most needy census tract is 15, the requirement will be a minimum need of 15. If more than one neighborhood is identified in the Action Plan, HUD will average the Neighborhood Scores, weighting the scores by the estimated number of housing units in each identified neighborhood.

Neighborhood NSP3 Score: 20

State Minimum Threshold NSP3 Score: 17

Total Housing Units in Neighborhood: 337

Area Benefit Eligibility

Percent Persons Less than 120% AMI: 71.5

Percent Persons Less than 80% AMI: 61.7

Neighborhood Attributes (Estimates)

Vacancy Estimate

USPS data on addresses not receiving mail in the last 90 days or "NoStat" can be a useful measure of whether or not a target area has a serious vacancy problem. For urban neighborhoods, HUD has found that neighborhoods with a very high number vacant addresses relative to the total addresses in an area to be a very good indicator of a current for potentially serious blight problem.

The USPS "NoStat" indicator can mean different things. In rural areas, it is an indicator of vacancy. However, it can also be an address that has been issued but not ever used, it can indicate units under development, and it can be a very distressed property (most of the still flood damaged properties in New Orleans are NoStat). When using this variable, users need to understand the target area identified.

In addition, the housing unit counts HUD gets from the US Census indicated above are usually close to the residential address counts from the USPS below. However, if the Census and USPS counts are substantially different for your identified target area, users are advised to use the information below with caution. For example if there are many NoStats in an area for units never built, the USPS residential address count may be larger than the Census number; if the area is a rural area largely served by PO boxes it may have fewer addresses than housing units.

USPS Residential Addresses in Neighborhood: 336

Residential Addresses Vacant 90 or more days (USPS, March 2010): 37

Residential Addresses NoStat (USPS, March 2010): 6

Foreclosure Estimates

HUD has developed a model for predicting where foreclosures are likely. That model estimates serious delinquency rates using data on the leading causes of foreclosures - subprime loans (HMDA Census Tract data on high cost and highly leveraged loans), increasing unemployment (BLS data on unemployment rate change), and fall in home values (FHFA data on house price change). The predicted serious delinquency rate is then used to apportion the state total counts of foreclosure starts (from the Mortgage Bankers Association) and REOs (from RealtyTrac) to individual block groups.

Total Housing Units to receive a mortgage between 2004 and 2007: 113

Percent of Housing Units with a high cost mortgage between 2004 and 2007: 59.5

Percent of Housing Units 90 or more days delinquent or in foreclosure: 13.9

Number of Foreclosure Starts in past year: 10

Number of Housing Units Real Estate Owned July 2009 to June 2010: 7

HUD is encouraging grantees to have small enough target areas for NSP 3 such that their dollars will have a visible impact on the neighborhood. Nationwide there have been over 1.9 million foreclosure completions in the past two years. NSP 1, 2, and 3 combined are estimated to only be able to address 100,000 to 120,000 foreclosures. To stabilize a neighborhood requires focused investment.

Estimated number of properties needed to make an impact in identified target area (20% of REO in past year): 2

Supporting Data

Metropolitan Area (or non-metropolitan area balance) percent fall in home value since peak value (Federal Housing Finance Agency Home Price Index through June 2010): -4

Place (if place over 20,000) or county unemployment rate June 2005: 5.2

Place (if place over 20,000) or county unemployment rate June 2010: 9.7

Bureau of Labor Statistics Local Area Unemployment Statistics

Market Analysis:

HUD is providing the data above as a tool for both neighborhood targeting and to help inform the strategy development. Some things to consider:

1. Persistent Unemployment. Is this an area with persistently high unemployment? Serious consideration should be given to a rental strategy rather than a homeownership strategy.
2. Home Value Change and Vacancy. Is this an area where foreclosures are largely due to a combination of falling home values, a recent spike in unemployment, and a relatively low vacancy rate? A down payment assistance program may be an effective strategy.
3. Persistently High Vacancy. Are there a high number of substandard vacant addresses in the target area of a community with persistently high unemployment? A demolition/land bank strategy with selected acquisition rehab for rental or lease-purchase might be considered.
4. Historically low vacancy that is now rising. A targeted strategy of acquisition for homeownership and rental to retain or regain neighborhood stability might be considered.
5. Historically high cost rental market. Does this market historically have very high rents with low vacancies? A strategy of acquiring properties and developing them as long-term affordable rental might be considered.

NSP3 Score

The neighborhoods identified by the NSP3 grantee as being the areas of greatest need must have an individual or average combined index score for the grantee's identified target geography that is not less than the lesser of 17 or the twentieth percentile most needy score in an individual state. For example, if a state's twentieth percentile most needy census tract is 18, the requirement will be a minimum need of 17. If, however, a state's twentieth percentile most needy census tract is 15, the requirement will be a minimum need of 15. If more than one neighborhood is identified in the Action Plan, HUD will average the Neighborhood Scores, weighting the scores by the estimated number of housing units in each identified neighborhood.

Neighborhood NSP3 Score: 19.72

State Minimum Threshold NSP3 Score: 17

Total Housing Units in Neighborhood: 861

Percent Persons Less than 120% AMI: 87.98

Percent Persons Less than 80% AMI: 62.89

Neighborhood Attributes (Estimates)

Vacancy Estimate

USPS data on addresses not receiving mail in the last 90 days or "NoStat" can be a useful measure of whether or not a target area has a serious vacancy problem. For urban neighborhoods, HUD has found that neighborhoods with a very high number vacant addresses relative to the total addresses in an area to be a very good indicator of a current for potentially serious blight problem.

The USPS "NoStat" indicator can mean different things. In rural areas, it is an indicator of vacancy. However, it can also be an address that has been issued but not ever used, it can indicate units under development, and it can be a very distressed property (most of the still flood damaged properties in New Orleans are NoStat). When using this variable, users need to understand the target area identified.

In addition, the housing unit counts HUD gets from the US Census indicated above are usually close to the residential address counts from the USPS below. However, if the Census and USPS counts are substantially different for your identified target area, users are advised to use the information below with caution. For example if there are many NoStats in an area for units never built, the USPS residential address count may be larger than the Census number; if the area is a rural area largely served by PO boxes it may have fewer addresses than housing units.

USPS Residential Addresses in Neighborhood: 845

Residential Addresses Vacant 90 or more days (USPS, March 2010): 116

Residential Addresses NoStat (USPS, March 2010): 74

Foreclosure Estimates

HUD has developed a model for predicting where foreclosures are likely. That model estimates serious delinquency rates using data on the leading causes of foreclosures - subprime loans (HMDA Census Tract data on high cost and highly leveraged loans), increasing unemployment (BLS data on unemployment rate change), and fall in home values (FHFA data on house price change). The predicted serious delinquency rate is then used to apportion the state total counts of foreclosure starts (from the Mortgage Bankers Association) and REOs (from RealtyTrac) to individual block groups.

Total Housing Units to receive a mortgage between 2004 and 2007: 149

Percent of Housing Units with a high cost mortgage between 2004 and 2007: 61.83

Percent of Housing Units 90 or more days delinquent or in foreclosure: 12.95

Number of Foreclosure Starts in past year: 13

Number of Housing Units Real Estate Owned July 2009 to June 2010: 8

HUD is encouraging grantees to have small enough target areas for NSP 3 such that their dollars will have a visible impact on the neighborhood. Nationwide there have been over 1.9 million foreclosure completions in the past two years. NSP 1, 2, and 3 combined are estimated to only be able to address 100,000 to 120,000 foreclosures. To stabilize a neighborhood requires focused investment.

Estimated number of properties needed to make an impact in identified target area (20% of REO in past year): 3

Supporting Data

Metropolitan Area (or non-metropolitan area balance) percent fall in home value since peak value (Federal Housing Finance Agency Home Price Index through June 2010): -4

Place (if place over 20,000) or county unemployment rate June 2005: 5.2

Place (if place over 20,000) or county unemployment rate June 2010: 9.7

Bureau of Labor Statistics Local Area Unemployment Statistics

Market Analysis:

HUD is providing the data above as a tool for both neighborhood targeting and to help inform the strategy development. Some things to consider:

1. Persistent Unemployment. Is this an area with persistently high unemployment? Serious consideration should be given to a rental strategy rather than a homeownership strategy.
2. Home Value Change and Vacancy. Is this an area where foreclosures are largely due to a combination of falling home values, a recent spike in unemployment, and a relatively low vacancy rate? A down payment assistance program may be an effective strategy.
3. Persistently High Vacancy. Are there a high number of substandard vacant addresses in the target area of a community with persistently high unemployment? A demolition/land bank strategy with selected acquisition rehab for rental or lease-purchase might be considered.
4. Historically low vacancy that is now rising. A targeted strategy of acquisition for homeownership and rental to retain or regain neighborhood stability might be considered.
5. Historically high cost rental market. Does this market historically have very high rents with low vacancies? A strategy of acquiring properties and developing them as long-term affordable rental might be considered.

NSP3 Score

The neighborhoods identified by the NSP3 grantee as being the areas of greatest need must have an individual or average combined index score for the grantee's identified target geography that is not less than the lesser of 17 or the twentieth percentile most needy score in an individual state. For example, if a state's twentieth percentile most needy census tract is 18, the requirement will be a minimum need of 17. If, however, a state's twentieth percentile most needy census tract is 15, the requirement will be a minimum need of 15. If more than one neighborhood is identified in the Action Plan, HUD will average the Neighborhood Scores, weighting the scores by the estimated number of housing units in each identified neighborhood.

Neighborhood NSP3 Score: 18

State Minimum Threshold NSP3 Score: 17

Total Housing Units in Neighborhood: 791

Percent Persons Less than 80% AMI: 67.65

Neighborhood Attributes (Estimates)

Vacancy Estimate

USPS data on addresses not receiving mail in the last 90 days or "NoStat" can be a useful measure of whether or not a target area has a serious vacancy problem. For urban neighborhoods, HUD has found that neighborhoods with a very high number vacant addresses relative to the total addresses in an area to be a very good indicator of a current or potentially serious blight problem.

The USPS "NoStat" indicator can mean different things. In rural areas, it is an indicator of vacancy. However, it can also be an address that has been issued but not ever used, it can indicate units under development, and it can be a very distressed property (most of the still flood damaged properties in New Orleans are NoStat). When using this variable, users need to understand the target area identified.

In addition, the housing unit counts HUD gets from the US Census indicated above are usually close to the residential address counts from the USPS below. However, if the Census and USPS counts are substantially different for your identified target area, users are advised to use the information below with caution. For example if there are many NoStats in an area for units never built, the USPS residential address count may be larger than the Census number; if the area is a rural area largely served by PO boxes it may have fewer addresses than housing units.

USPS Residential Addresses in Neighborhood: 755

Residential Addresses Vacant 90 or more days (USPS, March 2010): 157

Residential Addresses NoStat (USPS, March 2010): 16

Foreclosure Estimates

HUD has developed a model for predicting where foreclosures are likely. That model estimates serious delinquency rates using data on the leading causes of foreclosures - subprime loans (HMDA Census Tract data on high cost and highly leveraged loans), increasing unemployment (BLS data on unemployment rate change), and fall in home values (FHFA data on house price change). The predicted serious delinquency rate is then used to apportion the state total counts of foreclosure starts (from the Mortgage Bankers Association) and REOs (from RealtyTrac) to individual block groups.

Total Housing Units to receive a mortgage between 2004 and 2007: 151

Percent of Housing Units with a high cost mortgage between 2004 and 2007: 53.8

Percent of Housing Units 90 or more days delinquent or in foreclosure: 10.9

Number of Foreclosure Starts in past year: 11

Number of Housing Units Real Estate Owned July 2009 to June 2010: 7

HUD is encouraging grantees to have small enough target areas for NSP 3 such that their dollars will have a visible impact on the neighborhood. Nationwide there have been over 1.9 million foreclosure completions in the past two years. NSP 1, 2, and 3 combined are estimated to only be able to address 100,000 to 120,000 foreclosures. To stabilize a neighborhood requires focused investment.

Estimated number of properties needed to make an impact in identified target area (20% of REO in past year): 2

Supporting Data

Metropolitan Area (or non-metropolitan area balance) percent fall in home value since peak value (Federal Housing Finance Agency Home Price Index through June 2010): -4

Place (if place over 20,000) or county unemployment rate June 2005: 5.2

Place (if place over 20,000) or county unemployment rate June 2010: 9.7

Bureau of Labor Statistics Local Area Unemployment Statistics

Market Analysis:

HUD is providing the data above as a tool for both neighborhood targeting and to help inform the strategy development. Some things to consider:

1. Persistent Unemployment. Is this an area with persistently high unemployment? Serious consideration should be given to a rental strategy rather than a homeownership strategy.
2. Home Value Change and Vacancy. Is this an area where foreclosures are largely due to a combination of falling home values, a recent spike in unemployment, and a relatively low vacancy rate? A down payment assistance program may be an effective strategy.
3. Persistently High Vacancy. Are there a high number of substandard vacant addresses in the target area of a community with persistently high unemployment? A demolition/land bank strategy with selected acquisition rehab for rental or lease-purchase might be considered.
4. Historically low vacancy that is now rising. A targeted strategy of acquisition for homeownership and rental to retain or regain neighborhood stability might be considered.
5. Historically high cost rental market. Does this market historically have very high rents with low vacancies? A strategy of acquiring properties and developing them as long-term affordable rental might be considered.

Demolition Waiver Request

Describe current market conditions of your area and how demolition meets your NSP3 outcomes.

The housing market in Indianapolis has struggled to maintain the momentum of growth from the 1990s and early part of this decade. Overbuilding throughout the entire county and metropolitan statistical area has pushed foreclosure and vacancy rates higher as housing values decreased. Tract builders and low credit underwriting standards not only increased the volume of homebuyers, but increased the level of high cost and high leverage loans. As homebuyers moved to the new areas of growth, older areas in Indianapolis suffered disinvestment and abandonment. With the slowing economy and growing unemployment, the City of Indianapolis will invest in the target neighborhoods to stimulate private investment to stave off further decline.

Overbuilding is defined as building more housing units than the market will bear or number of households in a given area. If the number of households is significantly less than the number of housing units built each year, the area in which this takes place will experience higher abandonment and foreclosures.

The Planning Division within the City of Indianapolis conducted a study on the increase of housing units versus the number of households in the Indianapolis Metropolitan Statistical Area (MSA). The following items of note demonstrate the increase in vacancy rates because of the number of excessive housing units built in the entire area:

- The MSA increased in housing units from 1990 to 2000 by 109,002 units from 535,871 to 644,873. This is a 20 percent increase. The increase averages 10,900 housing units a year.
- Occupied housing units, or households, increased by 99,498 units in the ten-year period from 495,376 to 594,874. The increase averages 9,950 households a year.
- Since there was an average increase in housing units of 10,900 and an average increase in households of 9,950, there was an average of 950 housing units created each year in the MSA that were not needed to match a smaller growth in households.
- Vacant housing units increased by 9,504 units from 40,495 to 49,999 with an average of 950 units a year.
- Marion County had the greatest growth in both housing units and households from 1990-2000 with an increase in 37,780 units and 32,693 households. The increase in housing units exceeds that of households by 5,087.

Permits issued in Indianapolis have declined since 2000. One may be able to assume the housing bubble burst in Indianapolis early in the decade based on the time permits for new buildings declined in Indianapolis. Table 1 below shows the net gain of units for Indianapolis. The peak gain for units in Indianapolis was in 2001 with a steep decline every since that year. In many of the years, the decrease in permits issued for new housing units is greater than 25 percent.

Table 1: Net Gain Housing Units in Marion County

	New Permits- Demo Permits	% Increase (Decrease)
2001	6,080	
2002	4,913	-19.19%
2003	4,229	-13.92%
2004	4,446	5.13%
2005	3,950	-11.16%
2006	2,289	-42.05%
2007	1582	-30.89%
2008	1186	-25.03%

Based on the statistics from the above housing studies, overbuilding has had a large influence on the foreclosure and abandonment in Marion County/Indianapolis. Indianapolis grew heavily between 1990 and 2000 but could not sustain the growth. Gradually, through the current decade, growth has declined while vacancies and foreclosures have increased.

Factors affecting the Marion County abandonment and foreclosure problem extend beyond the borders of the county. From the late 1990s through recent years, the percentage of housing units built in the Indianapolis-Carmel MSA has outpaced population growth. At the same time, year-round vacant units have increased.

Table 2 summarizes the growth in housing units relative to the population. The U.S. Census Bureau estimates that population in the Indianapolis-Carmel MSA grew by 11 percent and housing units grew by 15 percent. Much of the housing unit growth in the region was from a population shift within the metropolitan area. This is confirmed by the 22 percent estimated population increase and 26 percent estimated housing unit increase in the MSA suburban counties.

Table 2: Estimated Population and Housing Units (000)

	2000 In Thousands	2007 In Thousands	Percent Change
Indianapolis-Carmel MSA			
Population	1,531.1	1,692.7	11%
Housing Units	648.5	746.7	15%

Table 2: Estimated Population and Housing Units (000) cont.

	2000 In Thousands	2007 In Thousands	Percent Change
Marion County			
Population	860.9	876.1	2%
Housing Units	388.4	418.1	8%
Suburban Counties in Indianapolis-Carmel MSA			
Population	670.2	816.6	22%
Housing Units	260.2	328.7	26%

Table 3 reports the estimated vacancy rate in the Indianapolis-Carmel MSA and the vacancy rate within the largest 75 MSAs. The Indianapolis-Carmel MSA vacancy rate is two points higher than rate within all of the 75 largest MSAs. Estimated housing and vacancy rate data can be combined to determine the excess number of vacant units, or over-supply, for the region.

Table 3: Estimated Vacancy Rates

	2005	2006	2007	2008
Indianapolis-Carmel	12.4	12.4	11.3	12.6
Within Largest 75 MSAs	9.3	9.7	10.3	10.6
U.S. Census Bureau: Vacant Housing Survey				

Over-supply is determined by taking the difference between current estimated vacancy rate and the vacancy rate in 2000 (6.9%) when the market was more stable. The difference is then multiplied by the most recent estimate of housing units. Based on those calculations, the Indianapolis-Carmel MSA has an excess housing stock of 42.6 thousand units. That excess amounts to an approximate six percent over-supply of units in the region.

The above data indicates that there is an over-supply of housing in Indianapolis. With vacancies, abandonment and foreclosures increasing, there is a need for demolition of blighted structures. Indianapolis is proposing to use 25% (\$2,000,000) of the NSP3 amount for Eligible Use D-Demolition of blighted properties. Over the past several years, we have built more residential units than we have households. As units continue to sit vacant, they deteriorate, attract crime and have a negative impact on surrounding house values. Demolition will remove neighborhood blight, reduce crime and increase the feasibility for future development.

How does demolition benefit your areas of greatest need?

The City of Indianapolis is requesting to spend 25 percent (\$2,000,000) of the NSP3 award to demolish the Winona Hospital under eligible use D-Demolition of the NSP3 program. This property is located at 3220 North Meridian Street.

The City of Indianapolis acquired this property through a tax foreclosure. This 2 ½ story brick veneer structure was built in 1965, and has four open elevators and an underground tunnel leading to the medical office building. This blighted property contains an exorbitant amount of hazardous materials. The City of Indianapolis consistently inspects to ensure that the property is properly secured; however, squatters and scrappers manage to find ways to access the building.

Winona sits in an area with great potential for neighborhood stabilization. This blighted abandoned hospital and hazardous elements are a hindrance for future development. It is located on a well traveled thoroughfare and needs to be cleared in order to support the improvement of the overall neighborhood. Demolition and remediation leading to eventual redevelopment are estimated at \$2 million.

How you are advancing your program?

The City has taken possession of the Winona site and is negotiating with the Children's Museum to transfer the property in its current condition. NSP3 funds will be granted to the Children's Museum to demolish the structures. Non-NSP3 funds will be used to redevelop the property for mixed uses. All parcels on this site will be sold for market value for redevelopment. Net sale proceeds will be reinvested in NSP3 eligible activities.

What hardship would occur to the areas/program if waiver is not approved?

Demolition is a critical component for the Winona site as its condition worsens every day. If the property is left unattended, the surrounding community will decline at even a greater rate. The abandoned blighted hospital contains hazardous materials that only inhibit any potential future development on or surrounding the site. Many unsuccessful attempts to secure this property from squatters and criminals have led to an extremely unsafe condition for individuals and businesses in the neighboring community. This hampers the ability to meaningfully redevelop the surrounding area.

The City of Indianapolis has invested over \$3 million dollars in the neighboring community using NSP 1 funds. This site is also within a close proximity to the award winning Fall Creek Place where millions have been invested to transform a blighted neighborhood. In addition this property is two blocks from the Indianapolis Children's Museum and is located on a major thoroughfare. The Winona Hospital is currently an impediment to development. In fact, the City of Indianapolis offered the property for sale in 2010. Developers were not able to respond with a feasible project due to the existing conditions of the hospital. Demolition and remediation are imperative to redevelopment of this site.

Energy Star

Energy Efficient Design

NSP funds can be used to promote energy efficiency in new construction and rehabilitation. By owners utilizing energy efficient design in the construction or rehabilitation, tenants will be able to reduce their overall monthly energy costs substantially, making their unit much more affordable. The NSP program encourages energy efficient design.

Energy Star qualified products include high performance windows, efficient heating and cooling equipment and Energy Star qualified lighting and appliances.

Through Energy Star, builders and other home industry professionals can differentiate themselves in the market. New projects that qualify as Energy Star provide greater comfort and durability for tenants. In addition, Energy Star qualified projects help protect the environment by reducing the greenhouse gas emissions associated with global warming and can reduce overall energy costs for the tenant or the homebuyer.

Energy efficiency modifications features are strongly encouraged in the redevelopment of rental housing units. Requirements and suggestions are identified below:

Appliance Requirements

Stoves, refrigerators, and central air conditioning units are permitted to be installed where appropriate. Any new unit installed must conform to Energy Star Standards. Clothes washers, dryers, and dishwashers are permitted when all of the following conditions are met.

1. NSP funds have rehabilitated or constructed the homes;
2. Installation of such appliances is comparable to unassisted homes in the local housing market;
3. Deed restrictions or covenants ensure that the appliances remain in the home, if appropriate;
4. Qualifying appliances meet or exceed Energy Star Standards.

Energy Efficiency/ Green Building Suggestions

1. High-Efficiency Toilets – if replacing existing toilets.
2. Low Flow Fixtures – if replacing faucets in the kitchen or bathroom.
3. Energy Star Water Heater, Furnace, Ceiling Fans, ventilation – if replacement is necessary.

1. Wall and Roof Insulation – Install formaldehyde-free wall and roof insulation; install insulation under siding; install attic insulation to R30; install insulation in walls to R19; use radiant barrier on attic floors.
2. Hard-surfaced flooring – Utilize hard-surfaced, resilient flooring materials such as, tile, wood, wood-laminate, bamboo, cork, natural linoleum, or finished concrete; use formaldehyde-free adhesives.
3. Recycled Content Carpet – When removing carpet, replace it with hard-surfaced flooring if possible. When carpet is installed, it should be tacked, not glued; use carpet products that are made from natural materials.
4. Windows and Doors – if replacing, adhere to Energy Star standards.
5. Paints and Finishes – Use only low- or zero-VOC paints, primers, sealants, adhesives, coatings, and other finishes; use recycled paint, water based or latex paints; use solvent-free adhesives and caulk.
6. Countertops – Use renewable or recycled materials.
7. Electric fixtures – Adhere to Energy Star standards; install CFL bulbs or LED bulbs.
8. Siding – Use alternates to wood, such as vinyl or recycled composite siding; caulk around windows and doors.
9. Roofing – Do not use LEAD roofing, boots or accessories; install recycled content asphalt shingles; provide light-colored or reflective roof; install 40-50 year shingle; install radian barrier sheathing.
10. Wood – Use naturally decay and termite resistant wood; use Forest Stewardship Council certified wood; recycle what is on job site.
11. Landscaping – Protect existing plants; use trees for shade on east and west; buildup soil around perimeter of home to drain water away; seed and straw.
12. Health and Safety – Install carbon monoxide detectors; replace furnace filters; repair or replace water heaters; repair gas leaks; install smoke detectors.

ATTACHMENT I

Indianapolis' procedure for creating a rental housing preference is that all housing units redeveloped with NSP3 funds will be rental.

VICINITY HIRING PLAN

Vicinity Plan

All Project Sponsors receiving federal funds for construction related projects such as, but not limited to, housing rehabilitation, new construction, and demolition must, to the maximum extent reasonable, provide for the hiring of employees that reside in the vicinity of NSP 3 funded projects or contract with small businesses that are owned and operated by persons residing in the vicinity of NSP3 projects.

Hiring within NSP3 vicinity

1. Examples of Opportunities Include: Accounting, Architecture, Appliance Repair, Bookkeeping, Bricklaying, Carpentry, Carpet Installation, Cement/Masonry, Computer Information, Demolition, Drywall, Electrical, Elevator Construction, Engineering, Fencing, Heating, Iron Works, Janitorial, Landscaping, Machine Operation, Manufacturing, Marketing, Painting, Plastering, Plumbing, Research, Surveying, Tile Setting, Transportation, Word Processing.
2. Below are suggested Procedures:
 - All job openings/employment opportunities must be posted in the Project Sponsor's office in a place that is visible to the public. In addition, all job openings shall be posted with the neighborhood community center that provides services within the project.
 - Signs must be posted in a visible location at each job site notifying the public of where they can go to inquire about possible employment and job training opportunities.
 - Utilize employment agencies.
 - Outreach to workforce services, local churches, community organizations, etc.

8. Certifications

Certifications for State and Entitlement Communities

(1) **Affirmatively further fair housing.** The jurisdiction certifies that it will affirmatively further fair housing, which means that it will conduct an analysis to identify impediments to fair housing choice within the jurisdiction, take appropriate actions to overcome the effects of any impediments identified through that analysis, and maintain records reflecting the analysis and actions in this regard.

(2) **Anti-displacement and relocation plan.** The applicant certifies that it has in effect and is following a residential anti-displacement and relocation assistance plan.

(3) **Anti-lobbying.** The jurisdiction must submit a certification with regard to compliance with restrictions on lobbying required by 24 CFR part 87, together with disclosure forms, if required by that part.

(4) **Authority of jurisdiction.** The jurisdiction certifies that the consolidated plan or abbreviated plan, as applicable, is authorized under state and local law (as applicable) and that the jurisdiction possesses the legal authority to carry out the programs for which it is seeking funding, in accordance with applicable HUD regulations and other program requirements.

(5) **Consistency with plan.** The jurisdiction certifies that the housing activities to be undertaken with NSP 3 funds are consistent with its consolidated plan or abbreviated plan, as applicable.

(6) **Acquisition and relocation.** The jurisdiction certifies that it will comply with the acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (42 U.S.C. 4601), and implementing regulations at 49 CFR part 24, except as those provisions are modified by the notice for the NSP 3 program published by HUD.

(7) **Section 3.** The jurisdiction certifies that it will comply with section 3 of the Housing and Urban Development Act of 1968 (12 U.S.C. 1701u), and implementing regulations at 24 CFR part 135.

(8) **Citizen participation.** The jurisdiction certifies that it is in full compliance and following a detailed citizen participation plan that satisfies the requirements of Sections 24 CFR 91.105 or 91.115, as modified by NSP 3 requirements.

(9) **Following a plan.** The jurisdiction certifies it is following a current consolidated plan (or Comprehensive Housing Affordability Strategy) that has been approved by HUD. [Only States and entitlement jurisdictions use this certification.]

(10) **Use of funds.** The jurisdiction certifies that it will comply with the Dodd-Frank Wall Street Reform and Consumer Protection Act and Title XII of Division A of the American Recovery and Reinvestment Act of 2009 by spending 50 percent of its grant funds within 2 years, and spending 100 percent within 3 years, of receipt of the grant.

(11) **The jurisdiction certifies:**

- a. that all of the NSP 3 funds made available to it will be used with respect to individuals and families whose incomes do not exceed 120 percent of area median income; and

- b. The jurisdiction will not attempt to recover any capital costs of public improvements assisted with CDBG funds, including Section 108 loan guaranteed funds, by assessing any amount against properties owned and occupied by persons of low- and moderate-income, including any fee charged or assessment made as a condition of obtaining access to such public improvements. However, if NSP 3 funds are used to pay the proportion of a fee or assessment attributable to the capital costs of public improvements (assisted in part with NSP 3 funds) financed from other revenue sources, an assessment or charge may be made against the property with respect to the public improvements financed by a source other than CDBG funds. In addition, with respect to properties owned and occupied by moderate-income (but not low-income) families, an assessment or charge may be made against the property with respect to the public improvements financed by a source other than NSP 3 funds if the jurisdiction certifies that it lacks NSP 3 or CDBG funds to cover the assessment.

(12) **Excessive force.** The jurisdiction certifies that it has adopted and is enforcing:

- a. A policy prohibiting the use of excessive force by law enforcement agencies within its jurisdiction against any individuals engaged in nonviolent civil rights demonstrations; and
- b. A policy of enforcing applicable state and local laws against physically barring entrance to, or exit from, a facility or location that is the subject of such nonviolent civil rights demonstrations within its jurisdiction.

(13) **Compliance with anti-discrimination laws.** The jurisdiction certifies that the NSP 3 grant will be conducted and administered in conformity with Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d), the Fair Housing Act (42 U.S.C. 3601-3619), and implementing regulations.

(14) **Compliance with lead-based paint procedures.** The jurisdiction certifies that its activities concerning lead-based paint will comply with the requirements of part 35, subparts A, B, J, K, and R of this title.

(15) **Compliance with laws.** The jurisdiction certifies that it will comply with applicable laws.

(16) **Vicinity hiring.** The jurisdiction certifies that it will, to the maximum extent feasible, provide for hiring of employees that reside in the vicinity of NSP 3 funded projects or contract with small businesses that are owned and operated by persons residing in the vicinity of NSP 3 projects.

(17) **Development of affordable rental housing.** The jurisdiction certifies that it will abide by the procedures described in its NSP 3 Abbreviated Plan to create preferences for the development of affordable rental housing for properties assisted with NSP 3 funds.
